

JioPay Campaign Payment Gateway Overview

JioPay Campaign allows businesses to run custom, targeted promotional offers and rewards for users, aiming to boost engagement and increase transactions. By creating incentives for users, businesses can drive more sales and enhance their relationships with customers.

Key Features:

1. Payment Method-Based Offers:

- Businesses can create offers that are tailored to specific payment methods, encouraging users to choose preferred or specific payment options for their transactions.

2. Product Personalization:

- Offers can be personalized based on the product catalog and user preferences, ensuring that promotions are relevant and appealing to the target audience.

3. Multiple Configurations:

- Businesses have the flexibility to configure various types of rewards (e.g., discounts, cashback) based on transaction amounts, product categories, or other criteria.

4. Data-Driven Personalization:

- Offers are designed based on data insights, ensuring that the campaigns are targeted to the right users at the right time, increasing the likelihood of higher engagement and conversions.

5. Superior Control:

- Businesses maintain full control over how offers are set up, customized, and executed. This ensures that all campaigns align with the business's objectives and brand identity.
-

Advantages:

- **Increase User Engagement:**

- By offering rewards and incentives, businesses can motivate users to engage more frequently, ultimately leading to more transactions.
 - Enhance Customer Satisfaction:
 - Rewarding users with personalized offers fosters better relationships and increases customer loyalty.
 - Boost Product Adoption:
 - Custom offers can be designed to promote specific products or services, driving increased adoption and sales.
-

Ideal For:

- Businesses looking to reward users for eligible transactions and grow their customer base through engaging and personalized promotions.
-

Key Metrics:

- 300 Million+ Transactions processed
 - 100K+ Unique merchants
 - 7 Million+ Cards tokenized
-
