

JioPay Repeat Payment Gateway Overview

JioPay Repeat offers a solution to businesses by allowing them to automate recurring payments, ensuring timely collections and a frictionless billing experience. The platform is designed to improve customer retention by enabling seamless recurring payments while reducing the operational burden of manual follow-ups.

Key Features:

1. Automatic Payments:

- JioPay Repeat enables businesses to automatically collect payments from users based on the set billing cycle (daily, weekly, monthly) using one-time mandates. This system eliminates the need for second-factor authentication during payment collections.

2. Recurring Billing:

- Set up auto-recurring payments with the desired frequency and let JioPay handle the rest. Payments are automatically debited on the specified dates, ensuring there are no missed transactions.

3. Mitigate Risk:

- By using the recurring payment feature, businesses can reduce ambiguity and mitigate the risk of late or missed payments, offering more predictable cash flow and security.

4. Payment Methods:

- JioPay Repeat supports both card payments and UPI as payment methods, allowing flexibility for users to pay via their preferred method.

5. Simple Integration:

- The service requires only a one-time setup, making it easy for businesses to integrate and manage the payment process. Once set up, the platform ensures automatic collection without additional manual intervention.
-

Advantages:

- **Increase Lifetime Value (LTV):**

- Automating recurring payments helps businesses to create a loyal customer base, increasing lifetime value and customer retention by reducing payment friction.
 - Convenience:
 - Customers benefit from a seamless, uninterrupted payment experience with automatic payments, enhancing their satisfaction with the service or product.
 - Complete Control:
 - Businesses maintain full control over their billing cycles, allowing them to set payment frequencies and manage transactions as needed.
-

Ideal For:

- Businesses that require cyclic, frictionless payments and need to mitigate risks related to missed payments or manual billing.
-

Key Metrics:

- 300 Million+ Transactions processed
 - 100K+ Unique merchants
 - 7 Million+ Cards tokenized
-
