

JioPay Vault Payment Gateway Overview

JioPay Vault is a powerful tokenization solution designed to help businesses securely store and manage their customers' payment card information for future transactions. By using tokenization, JioPay Vault simplifies payment processing while ensuring compliance with the latest security standards.

Key Features:

1. Compliant Tokenization:

- JioPay Vault tokenizes card details in a manner that adheres to the updated RBI guidelines and security standards.
- This ensures businesses stay compliant with regulatory requirements while securing sensitive customer data.

2. Reduce Transaction Time:

- By storing tokenized card details, future transactions can be completed faster, reducing friction at checkout and improving the customer experience.
- This helps to reduce abandoned transactions and cart abandonment rates, enhancing conversion rates.

3. Zero Disruption and One-Time Integration:

- Vault offers a seamless, one-time integration that can handle tokenization across multiple card networks.
- Once integrated, businesses don't need to re-implement or manage multiple systems for different payment networks.

4. Increase Conversions:

- By simplifying and speeding up the payment process, businesses can experience higher success rates for transactions and more repeat business from customers who prefer quick, easy checkout experiences.
-

Advantages:

- **Compliant with New Norms:** JioPay Vault's tokenization approach follows the latest norms from the RBI, ensuring that businesses adhere to the updated regulations for card payment security.

- **Seamless Experience:** Tokenized payments reduce friction at checkout, enhancing user experience and driving higher conversion rates.
 - **Secure and Safe Transactions:** Sensitive customer data is protected through tokenization, ensuring that businesses comply with the latest security and privacy standards.
-

Ideal For:

- **Businesses that want to simplify and streamline the payment process for their customers while ensuring data security and compliance with the latest regulatory standards.**
-

Key Metrics:

- **300 Million+ Transactions processed**
 - **100K+ Unique merchants**
 - **7 Million+ Cards tokenized**
-
