JioPay 1QR Payment Gateway Overview

JioPay 1QR is a versatile and efficient payment gateway solution designed for businesses to digitize COD (Cash on Delivery) and enable QR-based payments with automatic reconciliation. It simplifies the process of collecting payments, allowing businesses to accept payments digitally from all UPI apps with minimal development effort.

Key Features:

1. **Versatile QR Solutions:**

   ○ **1 QR enables businesses to accept payments from various sources, all using a single, unified QR code. This provides flexibility and convenience for both businesses and customers.**
2. **Omnichannel Capabilities:**

   ○ **You can offer payment acceptance across various digital channels and allow your customers to use any UPI app for transactions, making it more convenient for them.**
3. **Smart Reconciliation:**

   ○ **Automatic reconciliation ensures that payment records are matched with invoices or services provided, reducing manual effort and errors in accounting.**
4. **Smart Collection:**

   ○ **The 1 QR solution allows businesses to collect payments seamlessly from diverse payment methods while simplifying operations.**
5. **Easy Reconciliation:**

   ○ **Dynamic QR codes ensure smooth reconciliation of payments, making it easier for businesses to keep track of their transactions and reduce operational complexity.**

Advantages:

● **Effortless Payment Collection:**

- Collect payments digitally without the need for complex integrations. Perfect for businesses that want to digitize COD transactions and streamline their processes.
- **Business Growth:**

  - With automatic reconciliation and multiple payment options, businesses can grow efficiently by focusing on the customer experience and sales rather than manual processes.
- **Simplified Operations:**

  - The 1 QR solution eliminates the need for managing multiple payment methods and reconciliation systems, reducing the complexity for merchants.

Ideal For:

- Businesses wanting to digitize COD (Cash on Delivery) transactions.
- Merchants who want to accept QR payments from all UPI apps with automatic reconciliation.

Key Metrics:

- 300 Million+ Transactions processed
- 100K+ Unique merchants
- 7 Million+ Cards tokenized
